SEA (INDIA)

VOL: 1 No. 1

For Private Circulation Only

JULY 2001

A LONG-FELT NEED

It was a long-felt need for safety professionals to have an association for serving as a vital link at the national level. For achieving this objective, Safety Engineers Association (SEA-India) was started in January 2001. I am glad that there is a good response from safety professionals from Southern States. We hope that within a year or two, the response will be widespread from all parts of the country.

It is a matter of pride for all safety professionals that a quarterly journal by name "Indian Safety Engineer" is brought out by Safety Engineers Association (SEA-India).

The quarterly journal will serve the main objective of dissemination of much-needed information to safety professionals. Since the Editorial Board consists of well-experienced safety professionals, informative and educative articles can be expected.

Recently I had a chance to read a book titled 'Random Notes on Labour' written by a trade union leader Mr. P.K.G. Menon. In this book, he has mentioned that 'safe and healthy working life is still a distant dream for Indian workmen.'

As safety professionals, we should strive our best towards achieving a safe and healthy working life for the benefit of all.

I am sure that the articles, published in this journal, will be very useful to safety professionals.

Dr. M. LAKSHMANAN
President, SEA (India)
